Bookingfee

The bookingfee is €300 excl VAT. The bookingfee is non-refundable and must be booked before the mare is brought. When the mare is scanned pregnant the bookingfee will be withdrawn from the total studfee.

Swab test

We recommend a swab test from the uterus. This test can be taken at home before arrival or at Hengstenhouderij van Nunen. If the mare is unclear on the swab it is possible to have her treated here.

Upon arrival

- The mare is brought without shoes and with well-groomed hooves.
- The mare is vaccinated and the passport is delivered to Hengstenhouderij van Nunen.
- If the mare has eczema, bring the eczema blanket.
- The mare is healthy and recently dewormed.

During stay

Mares are inseminated, scanned and treated at the expense and risk of the mare owner.

Hengstenhouderij van Nunen reserves the right to call a veterinarian at our discretion at the owner's expense.

Mares with aggressive behavior or are difficult to catch are moved to a separate paddock at the owner's expense.

The mare-owner gives mandate for us to transport the mare.

Pregnancy ultrasound

Mares must be scanned for pregnancy between 15 and 21 days after ovulation and results must be reported to Hengstenhouderij van Nunen immediately after. The remaining amount for the covering and other expenses will be invoiced when the mare is +15 days pregnant. Payment period of 14 days.

Non-pregnancy

If the mare resorbs before the 45th day of pregnancy (from date of last insemination), van Nunen will issue a credit note of the 'by pregnancy' part of the studfee (bookingfee will not be refunded). Provided that a veterinary certificate of non-pregnancy is presented to van Nunen before the 45th day of pregnancy. If the certificate is not submitted in time, the issue of a credit note is not possible.

Covering certificate

The covering certificate will not be issued or forwarded to the respective breeding association until the studfee and all other costs have been settled.

Health

The mare owner guarantees that the mare/foal has not been in the vicinity of other horses with or symptoms of druse for the past 3 months
